

# **ANKARA UNIVERSITY**

## **INTERNATIONAL PROGRAMS**

**Ankara-2019**

**Dear Students,**

Ankara University is one of the oldest and the most eminent universities acting as a leader in the academic arena. Founded in 1946, Ankara University's roots extend to the middle of 1800's with the opening of Faculties of Veterinary Medicine, Agriculture and Political sciences. As a prominent university, it offers the most privileged opportunities to its students in scientific, cultural and social areas. I would proudly like to state that Ankara University educates well-equipped individuals with its outstanding academic members. We attach great importance to our university's modern and democratic identity, investigative and innovative understanding as well as participative and liberal approach. In the light of our universal values, we work devotedly to reach our student oriented goals. Our aim is to have our students acquire privileges during their education, and sustain those privileges after graduation as successful individuals with the "Ankara University" brand.

Ankara University is an institution promoting high quality education and competitiveness, striving to meet international standards and aiming to prepare professionals able to assert themselves following their graduation, either at home or in any country in the world. We are happy to offer more than 50 English courses towards degrees in various fields, which you will find in this catalogue.

Finally, I would like to express that I would be very pleased to welcome you to Ankara University and a member of Ankara University family. I sincerely wish you success in your endeavors.

**Sincerely**  
**Prof. Dr. Erkan İbiş**  
**Rector**

## BACHELOR DEGREE PROGRAMS IN ENGLISH

### FACULTY OF SCIENCE

#### PROGRAM NAME: MATHEMATICS

**Degree:** Bachelor's Degree

**Duration:** 4 years

**Language:** English

**Program Description:** The aim of the program is to train students to develop expertise in fundamental mathematical concepts, processes and teaching methods. The themes mainly include mathematical thinking and reasoning, methodologies, paradigms and complexity of learning mathematics. The Major Scientific Branches of the department are Algebra and Numbers Theory, Theory of Real and Complex Functions, Geometry, Fundamentals of Mathematics and Mathematical Logic, Applied Mathematics, Functional Analysis and Topology. The Bachelor of Science degree in Mathematics is granted to a candidate, who has fulfilled the requirements of the undergraduate Mathematics curriculum, as well as satisfying the general requirements for this degree.

**Contact:** e-mail: [math@science.ankara.edu.tr](mailto:math@science.ankara.edu.tr)

Phone : +90 312 2126720/1236

web: <http://mathematics.science.ankara.edu.tr/eng/index.html>

Program Details: [http://bbs.ankara.edu.tr/Amac\\_Hedef.aspx?bno=3988&bot=1579](http://bbs.ankara.edu.tr/Amac_Hedef.aspx?bno=3988&bot=1579)

## FACULTY OF SCIENCE

**PROGRAM NAME:** CHEMISTRY

**Degree:** Bachelor's Degree

**Duration:** 4 years

**Language:** English

**Program Description:** The program includes studies all kinds of interaction, change and transformation of energy and matter by using modern scientific methods. The students have to participate in training programs for 45 working days at a public or private institution operating in the field of chemistry. Thus, it is intended to bring the students to understand and solve potential problems more accurately by giving them the opportunity to specialize in different areas of chemistry. Department of Chemistry is acknowledged for seizing research and technology-oriented studies, educates chemists required in chemical industry who acquire outstanding labor force and strong, contemporary, innovative, superior qualities.

## FACULTY OF SCIENCE

### PROGRAM NAME: BIOLOGY

**Degree:** Bachelor's Degree

**Duration:** 4 years

**Language:** English

**Program Description:** The Department of Biology consists of General Biology, Zoology, Botany, Ecology, Molecular Biology, Biotechnology and Hydrobiology divisions. The aim of the department is to understand living organisms and live systems by encouraging scientific thinking and providing students theoretical knowledge and practice in the field of biology. Students learn practical application of biology, and inspire interest in medical, environmental or other biological topics. The department offers curriculums of fundamental concepts of all areas of biology and biology education, whereby they will develop their abilities and attitudes for actively inquiring into new problems in biology and science education.

**Contact:** e-mail: fen@ankara.edu.tr kurt@ankara.edu.tr

## FACULTY OF PHARMACY

**PROGRAM NAME:** PHARMACY

**Degree:** Bachelor's Degree

**Duration:** 5 years

**Language:** English

**Program Description:** The Program offers to be specialized in medicinal treatment and drugs, medicines and their development, use and effects from the point of view of natural sciences, health sciences, as well as social sciences. Students are expected to prepare a thesis in the final year. Scientific research is also a crucial activity at the Faculty, with numerous research projects of either a basic or fully applied nature regularly being carried out in its laboratories. In particular, students benefit from exchange programs such as Erasmus with 15 Pharmacy Faculties in Europe. The Faculty offers English MD programs in Analytical Chemistry, Pharmaceutical Technology, Pharmaceutical Toxicology, Pharmacognosy, Pharmacology and Pharmaceutical Chemistry. Graduates can work in public or hospital pharmacies, in the pharmaceutical industry, health authorities, regulatory agencies, or academia.

## FACULTY OF ENGINEERING

### PROGRAM NAME: COMPUTER ENGINEERING

**Degree:** Bachelor's Degree

**Duration:** 4 years

**Language:** English

**Program Description:** The department focuses its graduate teaching and research programs in the following areas: digital image and signal processing, fault-tolerant computing, software engineering, distributed systems (software), simulation, theory and implementation of (functional) languages, algorithm design and analysis. The program offers at both the introductory and intermediate levels in the above areas. Graduate courses leading to research topics are at the forefront of current knowledge and technology. Guided individual study projects, available in graduate courses, provide opportunities for student participation in research activities in the department and in the university. In the graduate program, original research in close association with individual faculty members is always emphasized.

Computer engineers have a broad spectrum of job opportunities, ranging from software development to computer hardware design; and from finance to telecommunication sectors. Computer engineers can work in their own start-up companies, software and hardware companies, big corporate firms where information technologies are central to their operations such as banks and consultancy companies, cutting edge research centers, engineering firms that design and produce state-of-the-art technologies, and in telecommunications companies

## FACULTY OF ENGINEERING

### PROGRAM NAME: BIOMEDICAL ENGINEERING

**Degree:** Bachelor's Degree

**Duration:** 4 years

**Language:** English

**Program Description:** Biomedical engineers combine their knowledge of engineering with biology, anatomy, and physiology to create devices and systems for a variety of healthcare issues. The program mainly consist of the development of medical imaging systems and software, the development of devices for the measurement and analysis of biological signals, improving the clinical diagnosis and treatment apparatus, biocompatible materials production, regenerative tissue formation, development of personalized therapies, production of pharmaceuticals and therapeutic biological compounds. We aim to trains engineers who can produce strategies, devices and solutions aimed for diagnosis and therapy for the health sector by applying engineering principles in life sciences; will develop new products and can make designs in order to improve current products; have high professional and ethical standards.

**Contact:** e-mail: [biyomedikal@ankara.edu.tr](mailto:biyomedikal@ankara.edu.tr)

Phone: +90 312 600 01 00/1816

web: [bme.eng.ankara.edu.tr](http://bme.eng.ankara.edu.tr)

Program Details: [http://bbs.ankara.edu.tr/Amac\\_Hedef.aspx?bno=3970&bot=1564](http://bbs.ankara.edu.tr/Amac_Hedef.aspx?bno=3970&bot=1564)

## FACULTY OF ENGINEERING

**PROGRAM NAME:** ELECTRICAL AND ELECTRONICS ENGINEERING

**Degree:** Bachelor's Degree

**Duration:** 4 years

**Language:** English

**Program Description:** The program provides professional training, and participation actively in applied and theoretical research as well as knowledge of basic sciences, such as mathematics, physics and chemistry together with an understanding of economics, social sciences and humanities. The curriculum concentrates on fundamentals of the department such as analog electronics, circuit theory, and digital circuits and systems. Selection of advanced courses in the areas of communication systems, image and video processing, speech processing, biomedical instruments, microwave theory and optical communication are available. Young graduates are able to find jobs in the areas of academy, IT, defense industries, communication companies, computer sciences and biomedical engineering related jobs.

**Contact:** e-mail: efe@eng.ankara.edu.tr

Phone: +90 312 203 3300 /1774

web: <http://eem.ankara.edu.tr/eindex.php>

Program Details: [http://bbs.ankara.edu.tr/Amac\\_Hedef.aspx?bno=3971&bot=1565](http://bbs.ankara.edu.tr/Amac_Hedef.aspx?bno=3971&bot=1565)

## FACULTY OF ENGINEERING

**PROGRAM NAME:** ENERGY ENGINEERING

**Degree:** Bachelor's Degree

**Duration:** 4 years

**Language:** English

**Program Description:** The program is suitable for academic developments since it is based on interdisciplinary collaborations. We strongly believe that the establishment of the department is important and beneficial since it is an integration of fundamental sciences (physics, chemistry and maths) and engineering programs (Chemical Engineering, Electrical-Electrical Engineering, Mechanical Engineering). The major fields of research include renewable energy technologies, design of energy production systems/units and their modifications and improvements, energy storage and design of energy materials. Graduates have sufficient theoretical and practical background for a successful profession and with application skills of fundamental scientific knowledge in the engineering practice, have skills and professional background in describing, formulating, modeling and analyzing the energy engineering problem, with a consideration for appropriate analytical solutions in all necessary situations. Graduates also have necessary technical, academic and practical knowledge and application confidence in the design and assessment of machines, mechanical systems or industrial processes with considerations of productivity, feasibility and environmental and social aspects.

Program Details: [http://bbs.ankara.edu.tr/Amac\\_Hedef.aspx?bno=4166&bot=1779](http://bbs.ankara.edu.tr/Amac_Hedef.aspx?bno=4166&bot=1779)

## FACULTY OF ENGINEERING

### PROGRAM NAME: PHYSICS ENGINEERING

**Degree:** Bachelor's Degree

**Duration:** 4 years

**Language:** English

**Program Description:** The department defines physical principles and applies these principles to engineering practices, describes engineering problems of physics engineering, examines physical events by using mathematics knowledge, find and apply proper theories and approaches to the complicated problems on physics engineering. The Engineering Physics students are required to take classes and lab courses in four years as well as performing 45 days internship in a company in order to graduate and get a Bachelor of (Science) Engineering Physics title. After completing their undergraduate education students can continue their graduate studies by joining Master of Science program (MSc) and later Doctor of Philosophy (PhD) program leading Master of Engineering Physics and PhD of Engineering Physics degrees, respectively.

Engineering Physics is a wide discipline, which includes a variety of sub-disciplines, so the expected career path of graduates holding a degree in this area depends only on the interests of graduates and their specialization. The most common employers of Engineering Physics graduates are research institutes, government, large and small industries, medical and pharmacological enterprises, factories.

## FACULTY OF ENGINEERING

### PROGRAM NAME: FOOD ENGINEERING

**Degree:** Bachelor's Degree

**Duration:** 4 years

**Language:** English

**Program Description:** The curriculum starts with fundamental courses including mathematics, physics, chemistry, and follows with basic engineering courses including thermodynamics, fluid mechanics, energy and mass balance, reaction kinetics, unit operations, and finally completed with food chemistry, food microbiology, food analysis, food quality control in the food science field, and cereal technology, fruit and vegetable processing, meat technology, fats and oil technology, and dairy technology in the food technology field. Also, many elective courses in the field of social sciences are available. The projects focus on chemical composition of food, food microbiology, food safety, shelf-life study of food, process improvement, and product development. Graduates with a degree in Food Engineering work for a variety of organizations including research laboratories, food production plants, academic and governmental institutions, and auditing companies. Also, the graduates can start own business such as on consulting, and project development.

**Contact:** e-mail: [foodeng@ankara.edu.tr](mailto:foodeng@ankara.edu.tr)

Phone: +90 312 203 33 00

web: <http://food.eng.ankara.edu.tr/en/>

Program Details: [http://bbs.ankara.edu.tr/Amac\\_Hedef.aspx?bno=4294&bot=1911](http://bbs.ankara.edu.tr/Amac_Hedef.aspx?bno=4294&bot=1911)

## FACULTY OF ENGINEERING

### PROGRAM NAME: CHEMICAL ENGINEERING

**Degree:** Bachelor's Degree

**Duration:** 4 years

**Language:** English

**Program Description:** The program provides students with strong fundamental knowledge on basic sciences as physics, chemistry and mathematics and then more advanced courses are offered. Among these are conservation of mass and energy, separation processes, reaction engineering, thermodynamics, transfer of heat, mass and fluent, process design and control, all of which constitute the base of the education. Technical facilities, computers and laboratories are widely used in teaching to promote the quality of education. The department focuses to graduate students; with ability to apply their knowledge to the analysis, design, operation and control of the systems, with skills to perform in public and private sector in operation, management or research positions in the field of chemical engineering and related areas such as food engineering, environmental engineering, biochemical engineering and process system engineering. Also graduates will have the ability to fit in teams both as a member and as a leader, teach and lead research work in other universities, life-long learning intention, environmental and societal awareness. Graduates are able to make researches on the production of the desired products and related production processes and then help to design and set up the systems in an environmentally friendly and economical way.

**Contact:** e-mail: chemeng@eng.ankara.edu.tr

Phone: +90 312 203 33 03

web: <http://chem-eng.en.ankara.edu.tr/>

Program Details: [http://bbs.ankara.edu.tr/Amac\\_Hedef.aspx?bno=4295&bot=1912](http://bbs.ankara.edu.tr/Amac_Hedef.aspx?bno=4295&bot=1912)

## FACULTY OF ENGINEERING

**PROGRAM NAME:** GEOLOGICAL ENGINEERING

**Degree:** Bachelor's Degree

**Duration:** 4 years

**Language:** English

**Program Description:** Major branches of the department are General Geology, Mineralogy and Petrography, Geochemistry and Ore Deposits and Applied Geology. The program aims to teach the material of the Earth, the fields of physics that act on the earth's crust, the history of the place, the fossilized life forms, the chemistry of the material that makes up the earth, explore the water, mineral resources and oil deposits in the Earth's crust. To be able to foresee the earthquake of crust's dynasty, to be able to foresee the dangers that will affect human life. To be able to determine infrastructural instabilities for engineering works and to plan engineering designs for their measures. To produce geological maps showing various features of crust. To train geological engineers who can use modern engineering tools and methods for all these studies, who can observe human health, safety, and aim to learn life-long. Geological Engineering use mathematical, scientific and engineering knowledge in resolving Geological Engineering problems. Define processes of Geological Engineering and apply them in the working field. Examine the contributions of engineering solutions to health, safety and environmental issues. Design architecture of earth in three dimensions.

**Contact:** e-mail: [jeosek@eng.ankara.edu.tr](mailto:jeosek@eng.ankara.edu.tr)

Phone: +90 312 203 33 68

Program Details: [http://bbs.ankara.edu.tr/Amac\\_Hedef.aspx?bno=1824&bot=421](http://bbs.ankara.edu.tr/Amac_Hedef.aspx?bno=1824&bot=421)

## FACULTY OF MEDICINE

**PROGRAM NAME:** MEDICINE

**Degree:** Bachelor's Degree

**Duration:** 6 years

**Language:** English

**Program Description:** Medicine is a thriving and ambitious multidisciplinary faculty and one of the national leaders in medical education, with an outstanding reputation for our combined expertise in research and teaching. The program is human system based and integrated in which student-centered learning methods. The curriculum aims to raise physicians who work nationally and internationally. Research activities have been dominated in this program. Qualified international students are also expected to apply to the program. The graduates who completed the program are expected to be a good physician, to communicate effectively with patients, their relatives and health professionals, to have leadership, to be a team member, to act professionally, to think and act scientifically.

The modern, spiral, highly-integrated medical curriculum combines a range of learning strategies, including: early clinical experience, integrated communication and clinical skills teaching, practical sessions, lectures, and seminars.

We train tomorrow's doctors on a vibrant undergraduate medical course and we are dedicated to excellence in medical research and educating the next generation of healthcare professionals

## FACULTY OF LANGUAGES, HISTORY AND GEOGRAPHY

**PROGRAM NAME:** PHILOSOPHY

**Degree:** Bachelor's Degree

**Duration:** 4 years

**Language:** English

**Program Description:** Program aims to redound students questioning and creative thinking habits and basic information about the philosophy. Especially following philosophical trends and issues are at the forefront of program: Existentialism, Phenomenology and Contemporary Philosophy Movement, Aesthetic Human Rights, State and Society Philosophy, Philosophy of Education, History and Philosophy of Science, Philosophy of Language, idealistic philosophy. Program also focus to raise awareness concerning the need of philosophical knowledge in various fields of knowledge and in leading personal and social life; and to grow graduates who carry out notable researches, work in various academic institutions both in Turkey and in abroad, and contribute to science and humanity. Graduates are able to identify major philosophers and philosophical thoughts; define basic concepts in philosophy; list various philosophical investigation procedures; define basic techniques, concepts used in formal and informal logic and philosophical explanation of scientific and philosophical texts.

web: <http://felsefe.humanity.ankara.edu.tr/>

Program Details: [http://bbs.ankara.edu.tr/Amac\\_Hedef.aspx?bno=4296&bot=1917](http://bbs.ankara.edu.tr/Amac_Hedef.aspx?bno=4296&bot=1917)

## FACULTY OF LANGUAGES, HISTORY AND GEOGRAPHY

### PROGRAM NAME: ARCHAEOLOGY

**Degree:** Bachelor's Degree

**Duration:** 4 years

**Language:** English

**Program Description:** Prehistoric Archaeology, Proto-history and Near Eastern Archaeology and Classical Archaeology are the three sub-disciplines of the department. Prehistoric Archaeology studies and examines all facts about humans, their life styles and behaviours during the related time span. It also studies the natural environment in which humans live, and chronologically examines findings recovered through excavations. The Department of Proto-history and Near Eastern Archaeology studies the civilizations of the ancient Near East in a long time span starting from the Neolithic Period (ca. 10,000 B.C.) which marks the beginning of the first agricultural activities and the appearance of first settlements, followed by the Chalcolithic Period (5,000 B.C.) and Bronze Ages (3,000 – 1,200 B.C.), until the end of the Iron Age (1,000 – 500 B.C.). Department of Classical Archaeology covers the Greek and Roman civilizations and offers courses on the Minoan culture in Crete, Mycenaean civilization in Mainland Greece, Proto- Geometric and Geometric periods, Archaic, Classical and Hellenistic periods followed by the Roman Empire with a special emphasis on Western Anatolia. Graduates are able to define and use the basic concepts and scientific methods of archaeology; date and evaluate archaeological materials by stylistic analysis and other comparative techniques; learn the basic principles of stratigraphy and evaluate individual structures by defining their chronological sequences; learn the scientific methods used in dating of archaeological materials. Theoretical courses on the cultural history of different civilizations deal with various aspects in detail and are supported with rich visual material.

Program Details: [http://bbs.ankara.edu.tr/Amac\\_Hedef.aspx?bno=1688&bot=285](http://bbs.ankara.edu.tr/Amac_Hedef.aspx?bno=1688&bot=285)

## FACULTY OF LANGUAGES, HISTORY AND GEOGRAPHY

### PROGRAM NAME: ANTHROPOLOGY

**Degree:** Bachelor's Degree

**Duration:** 4 years

**Language:** English

**Program Description:** Anthropology program examines past and present societies comparatively from biological and cultural perspective and reveals the differences and similarities emerged with evolution and change. In Anthropology program, while examining the diversity of people within time and space, on the other hand, social and cultural relations are described. The most important feature of the anthropology is that it has a universalist and holistic perspective. From this point, in Anthropology program, on one hand, when discussing all aspects of the biological and cultural differences, on the other hand, an equal distance to all the differences and similarities are taught. No matter which sub-discipline of anthropology programs, the students training in this program, are trying to gain a global perspective rather than being self-centered.

The aim of program is to train researchers who evaluate human societies from biological and cultural aspects by taking a holistic perspective. Describe the fundamental concepts and terminology of anthropology discipline. Identify the historical process through which humans are evolved adopted a sedentary lifestyle and diversified various cultures. Analyse the material cultural units of various cultures, the practices that they developed through the ways, which they organize their environment and life worlds based on human-object/human-nature/human-environment dichotomies.

## FACULTY OF AGRICULTURE

### PROGRAM NAME: FISHERIES AND AQUACULTURE ENGINEERING

**Degree:** Bachelor's Degree

**Duration:** 4 years

**Language:** English

**Program Description:** Program is mainly understanding of system most obviously aquaculture production systems, but increasingly wider aquatic resource system which is manipulated for societal aims food production, financial gain, ecological quality, aesthetic value and human livelihood. The Program offers both theoretical and practical study for undergraduate students on fisheries and aquaculture. Graduates are capable of offering consultancy services regarding fisheries management, hatchery, and nursery and on growing techniques of cold and warm water fish as well as fish processing. Graduates can be employed in governmental institutions, non-governmental organizations and private sector, academic fields or national-international research projects related to different fields of fisheries and aquaculture, globally.

## FACULTY OF VETERINARY MEDICINE

### PROGRAM NAME: VETERINARY MEDICINE

**Degree:** Bachelor's Degree

**Duration:** 5 years

**Language:** English

**Program Description:** We provide a fresh approach to veterinary education with a progressive and dynamic environment, which delivers an outstanding student experience. The program offers animal medicine, biomedical research as well as public health springs including animal health sector for improvement, producing, breeding of domestic and farm animals, prevented all animal species involved bee and wild animals, preventing epidemic and zoonotic diseases, improvement the living animal number and animal production, keeping and developing the grade, quality, produce, safety and health of foods as animal origin. Our teaching integrates small and large group tuition areas, clinical skills labs and the latest technology to encourage collaboration, discussion and debate. A veterinary medical hospital of the faculty devoted to improving the health and well-being of animals.

## FACULTY OF DIVINITY

**PROGRAM NAME:** DIVINITY

**Degree:** Bachelor's Degree

**Duration:** 4 years

**Language:** English

**Program Description:** The English Divinity Program designed to impart to students a comprehensive knowledge of the fields of Islamic theology and religious studies. We aim to create a scholarly and intercultural environment comprised of dedicated students, scholars, and intellectuals, and disseminating what it has to offer to international scholarship in Islamic disciplines. Complementing this focus on traditional Islamic studies is an equal emphasis on critical thinking and the modern social sciences and humanities, harmoniously blending the two to ensure that students are solidly grounded in the classical Islamic disciplines and also equipped to use their knowledge in today's intellectual climate.

## FACULTY OF DENTISTRY

**PROGRAM NAME:** DENTISTRY

**Degree:** Bachelor's Degree

**Duration:** 5 years

**Language:** English

**Program Description:** This program provides students to have competence about clinical sciences and basic medical sciences in the field of dentistry and to perform dental operations. The goal of this program is to have competency in clinical dentistry (including oral and maxillofacial surgery, oral and maxillofacial radiology, restorative treatment, endodontic treatment, pedodontics, periodontology, prosthetic treatments) and in basic medical sciences (including anatomy, microbiology, organic chemistry, biochemistry, pharmacology, pathology, physiology, histology). A Dental medical hospital of the faculty devoted to improving the dental health of patients.

Performs dental practice according to current legal regulations, be aware of the responsibility of a dentist, protecting the rights of dentists and patients. Obeys the rules about own duties, laws, regulations, legislations about own rights and responsibilities, ethic regulations.

**Contact:** e-mail: [ggur@dentistry.ankara.edu.tr](mailto:ggur@dentistry.ankara.edu.tr)

Phone: +90 312 296 55 55

web: <http://www.dentistry.ankara.edu.tr/en/mainpage/>

## FACULTY OF POLITICAL SCIENCE

**PROGRAM NAME:** POLITICS AND ECONOMICS

**Degree:** Bachelor's Degree

**Duration:** 4 years

**Language:** English

**Program Description:** This is a unique program within the Turkish higher education system. Examples of the program are frequently encountered in countries such as the Anglo-Saxon education system that prioritizes competition and entrepreneurship. The curriculum of the program offers courses for all branches of social sciences. In this respect, this program aims to train fully equipped bureaucrats in accordance with the necessities of the time. This program, called "Politics and Economics", was created by combining the complementary fields of politics and economics. On the one hand, it is aimed to examine political concepts and theories in different cultures and systems comparatively; on the other hand, it is aimed to teach analytical methods of economics and to apply these methods in different problem areas. Looking at the content of the curriculum, the first two years there are core courses in the broad spectrum of social sciences. In the 3rd and 4th years, students are expected to specialize in the field of interest by selecting courses from different disciplines such as economics, political science, public administration, labor economics and industrial relations, public finance, international relations and business. In this way, graduates have a solid foundation to build a career in a wide range of areas, from bureaucracy to non-governmental organizations and international organizations, from big companies to small businesses.

## **MASTER'S DEGREE PROGRAMS IN ENGLISH**

### **GRADUATE SCHOOL OF HEALTH SCIENCES**

**PROGRAM NAME:** PHYSICAL ACTIVITY HEALTH AND SPORT SCIENCES

**Degree:** Master of Science

**Duration:** 2 years

**Language:** English

**Program Description:** This program aims to educate sport health specialists who have comprehensive knowledge about physiological, anatomical, biological and biomedical basis of the sport activities, sportive exercise physiology, sportsman health, sport injuries, rehabilitation in sport, and also have the ability to use this knowledge to prepare exercise application plans for individuals from all age, gender and health level. Our mission is to provide a first class sporting, participation, performance, administration and leadership experience for students. Our program is recognized for its excellence in education, learning and research. Graduates could work at hospitals, rehabilitation centers, sport clubs and training centers.

**Language Requirement:** No requirement for international applicants. No requirement for Turkish applicants who have completed whole university education in a foreign country.

**Where to apply:** Graduate School of Health Sciences-<http://sagbilens.ankara.edu.tr/en/>

**Contact:** e-mail: [mkoz@ankara.edu.tr](mailto:mkoz@ankara.edu.tr)

## GRADUATE SCHOOL OF HEALTH SCIENCES

### PROGRAM NAME: ANALYTICAL CHEMISTRY

**Degree:** Master of Science

**Duration:** 2 years

**Language:** English

**Program Description:** The Department has a rich tradition of excellence in the field of Analytical Chemistry and provides an outstanding program in this area including pharmaceutical analysis, instrumental techniques. MSc degree course is focused in basic areas of Analytical Chemistry, particularly in Analytical methodologies and the development of new analytical methods for drug analysis as well as planned to provide advance analytical knowledge and hands-on training modern analytical instrumental methods and their principals with applications. In this program, chromatographic, electrochemical and spectroscopic techniques are main topics together with chemo metrics, sensors, instrumentation and advanced research projects. MSc degree program will provide you a scientific experience in a chosen field.

**Language Requirement:** No requirement for international applicants. No requirement for Turkish applicants who have completed whole university education in a foreign country.

**Where to apply:** Graduate School of Health Sciences-<http://sagbilens.ankara.edu.tr/en/>

**Contact:** e-mail: [buslu@pharmacy.ankara.edu.tr](mailto:buslu@pharmacy.ankara.edu.tr)

## GRADUATE SCHOOL OF HEALTH SCIENCES

### PROGRAM NAME: PHARMACEUTICAL CHEMISTRY

**Degree:** Master of Science

**Duration:** 2 years

**Language:** English

**Program Description:** The program focuses on how organic compounds affect biological systems, drug development strategies, basic disease information with patient-oriented knowledge, recent application of QSAR studies, new applications of instrumental analysis techniques such as NMR and Mass spectroscopy as well as synthesis and metabolism of biological active molecules, relationships between chemical structure and pharmacokinetic and pharmacodynamics characteristics and their mechanism of action. The outcomes of the program can be summarized as: knowledge in the promotion of rational drug design, synthesis and therapy as well as practice pharmaceutical care, implement rational drug use. Provide highly competitive pharmacists that will perfectly suit the expectations of the pharmaceutical sector.

**Language Requirement:** No requirement for international applicants. No requirement for Turkish applicants who have completed whole university education in a foreign country.

**Where to apply:** Graduate School of Health Sciences-<http://sagbilens.ankara.edu.tr/en/>

**Contact:** e-mail: [fkimya@pharmacy.ankara.edu.tr](mailto:fkimya@pharmacy.ankara.edu.tr)

## GRADUATE SCHOOL OF HEALTH SCIENCES

### PROGRAM NAME: PHARMACEUTICAL TECHNOLOGY

**Degree:** Master of Science

**Duration:** 2 years

**Language:** English

**Program Description:** Pharmaceutical Technology provides information about the development, control, inspection and quality assurance of human and veterinary pharmaceutical dosage forms; inputs used in pharmaceutical manufacturing and quality control (natural and synthetic originated active ingredients, pharmaceutical excipients and equipment); related issues like bio pharmaceuticals-pharmacokinetics, bioavailability/bioequivalence, cosmetology, controlled release systems, pharmaceutical biotechnology, stability of drug and active ingredient, validation and drug registration, gives theoretical / practical skills and educates competent scientist in these issues. Pharmaceutical Technology is interested in the production of dosage forms, inspection of each steps and inputs that provide the quality assurance in the production, identification and solution of problems, bioavailability and stability of dosage forms, special drug releasing systems, drug targeting, providing maintenance on the properties of dosage forms and development of new drug delivery systems. Objective of the program is to educate scientific staff about above mentioned topics. Graduates have information, skills and competencies about pharmaceutical technology, pharmaceutical biotechnology, cosmetology, biopharmaceuticals-pharmacokinetics and radiopharmaceuticals.

**Language Requirement:** No requirement for international applicants. No requirement for Turkish applicants who have completed whole university education in a foreign country.

**Where to apply:** Graduate School of Health Sciences-<http://sagbilens.ankara.edu.tr/en/>

**Contact:** e-mail: [nozdemir@pharmacy.ankara.edu.tr](mailto:nozdemir@pharmacy.ankara.edu.tr)

## GRADUATE SCHOOL OF HEALTH SCIENCES

### PROGRAM NAME: PHARMACEUTICAL TOXICOLOGY

**Degree:** Master of Science

**Duration:** 2 years

**Language:** English

**Program Description:** The program focuses on hazardous effects of drugs and chemical substances in environment beneath the knowledge of their toxic kinetic and toxic dynamic effects in organisms. The definition of toxicology is “Science examining the interactions between xenobiotic and biological systems dealing with the health effects” or “Science obtaining the innocuousness limits of the chemicals”. On the other hand, as there are many subtopics of toxicology such as descriptive toxicology, clinical toxicology, environmental toxicology, industrial toxicology, forensic toxicology, ecotoxicology and analytical toxicology it will be more useful to make a definition related with the areas of these subtopics. The truth is that, every chemical shows its toxic effects related to its dose so this fact makes the area of toxicology wider day-by-day involving drugs, cosmetics, food additives, pesticides, household products and industrial chemicals. Graduates enhance their toxicology knowledge about toxicology basics, mechanisms and practices. They assess and use the original information and technologies in the field of toxicology. They make contact between toxicology and the other disciplines such as pharmacology, biochemistry, genetics, biophysics and forensic science, which are collaborator sciences of toxicology.

**Language Requirement:** No requirement for international applicants. No requirement for Turkish applicants who have completed whole university education in a foreign country.

**Where to apply:** Graduate School of Health Sciences-<http://sagbilens.ankara.edu.tr/en/>

**Contact:** e-mail: [eke@pharmacy.ankara.edu.tr](mailto:eke@pharmacy.ankara.edu.tr)

Program Details: [http://bbs.ankara.edu.tr/Amac\\_Hedef.aspx?bno=4320&bot=1942](http://bbs.ankara.edu.tr/Amac_Hedef.aspx?bno=4320&bot=1942)

## GRADUATE SCHOOL OF HEALTH SCIENCES

### PROGRAM NAME: PHARMACOGNOSY

**Degree:** Master of Science

**Duration:** 2 years

**Language:** English

**Program Description:** The program focuses on substances and starting materials with a wide range of biological activities obtained usually from plants, animals and microorganisms (fermentation). Pharmacognosy also dealing with extraction of natural sources, isolation of natural compounds using different chromatographic methods (TLC, CC, VLC, MPLC, Prep. HPLC *etc.*), bioactivity guided fractionation, qualitative and quantitative analysis (HPLC-DAD, GC-MS, HPTLC *etc.*), biological activity tests. The program aims to create a pharmacological infrastructure for doctoral studies by obtaining higher level and original information based on the qualification of the undergraduate. By establishing relationships among the various disciplines of the pharmaceutical sciences to which pharmacognosy is concerned; reaching various conclusions using expertise in analysing, synthesizing and evaluating new and complex ideas. A new extraction of pharmacognosy can be applied to other fields of distillation, chromatographic analysis and biologically active pharmacy.

**Language Requirement:** No requirement for international applicants. No requirement for Turkish applicants who have completed whole university education in a foreign country.

**Where to apply:** Graduate School of Health Sciences-<http://sagbilens.ankara.edu.tr/en/>

**Contact:** e-mail: [altun@pharmacy.ankara.edu.tr](mailto:altun@pharmacy.ankara.edu.tr)

Phone: +90 312 203 30 90

web: <http://fkognozi.pharmacy.ankara.edu.tr/en/>

Program Details: [http://bbs.ankara.edu.tr/Amac\\_Hedef.aspx?bno=4314&bot=1933](http://bbs.ankara.edu.tr/Amac_Hedef.aspx?bno=4314&bot=1933)

## GRADUATE SCHOOL OF HEALTH SCIENCES

**PROGRAM NAME:** PHARMACOLOGY

**Degree:** Master of Science

**Duration:** 2 years

**Language:** English

**Program Description:** This program is designed for delivering the steps for scientific research in health sciences and for this process to be completed based on pharmacology. It is primarily for graduates of 4- or 5-year undergraduate programs in health sciences. The program consists of advanced level theoretical pharmacology lectures within the first two academic semesters followed by the completion of a thesis based on laboratory work. A preparation for advanced academic work such as a PhD or advancing undergraduate level pharmacology information by focusing on a group of drugs, patient or disease are aimed by this program. Create a pharmacological infrastructure for doctoral studies by obtaining higher level and original information based on the qualification of the undergraduate. Provision of experimental animals used in pharmacological investigations, maintenance and preparation of experimental material in accordance with the determined protocol are carried out within the framework of ethical rules.

**Language Requirement:** No requirement for international applicants. No requirement for Turkish applicants who have completed whole university education in a foreign country.

**Where to apply:** Graduate School of Health Sciences-<http://sagbilens.ankara.edu.tr/en/>

**Contact:** e-mail: [abesikci@ankara.edu.tr](mailto:abesikci@ankara.edu.tr)

Program Details: [http://bbs.ankara.edu.tr/Amac\\_Hedef.aspx?bno=4316&bot=1935](http://bbs.ankara.edu.tr/Amac_Hedef.aspx?bno=4316&bot=1935)

## GRADUATE SCHOOL OF HEALTH SCIENCES

**PROGRAM NAME:** HEALTH POLICY, ECONOMICS AND MANAGEMENT

**Degree:** Master of Science

**Duration:** 2 years

**Language:** English

**Program Description:** The program's goal is to be a pioneer both in Turkey and the world by becoming a quality example in education in national and international level by educating health administrators to work at every stage of the healthcare industry, training innovative students and researchers with the ability to change oneself and society. The program is also aim to train health managers who have ability to think independently and analytically to deliver more efficient and effective health services; to develop community's health culture; to advance individuals' quality of life; to improve scientific knowledge in the field.

**Language Requirement:** No requirement for international applicants. No requirement for Turkish applicants who have completed whole university education in a foreign country.

**Where to apply:** Graduate School of Health Sciences-<http://sagbilens.ankara.edu.tr/en/>

**Contact:** e-mail: [gulbiye@health.ankara.edu.tr](mailto:gulbiye@health.ankara.edu.tr)

## GRADUATE SCHOOL OF NUCLEAR SCIENCES

**PROGRAM NAME:** HEALTH PHYSICS

**Degree:** Master of Science

**Duration:** 2 years

**Language:** English

**Program Description:** Health physics as an interdisciplinary field, which includes physics, biology, chemistry, engineering and statistics components, examines and enhances natural and human made radiation sources, the interaction mechanisms of radiation with human and environment, techniques used for radiation detection and measurement and principles of radiation protection. The aim of the program is to educate professionals, who has a grasp of the effects of radiation on human health and environment, knows and implies the principles of radiation safety and radiation protection and trains people about these topics, uses radiation in field of medicine and environmental practices safely. The program includes theoretical and experimental lectures about the practices of radiation such as medical imaging and radiotherapy, dosimetry, retrospective dosimetry and environmental radiation measurements. The learning outcomes: imply the radiation protection principles on hazardous effects of radiation, use ionization radiation on medical and environmental practices, inform population. The graduates can work at imaging and radiotherapy departments, public and private institutes which performs quality control tests of medical imaging systems that uses radiation, organizations which specifies, implements and controls the legislations about radiation and nuclear technologies, educational institutions which supplies courses and services about radiation safety and radiation protection.

**Language Requirement:** No requirement for international applicants. No requirement for Turkish applicants who have completed whole university education in a foreign country.

**Where to apply:** Graduate School of Nuclear Sciences- <http://ins.en.ankara.edu.tr/>

**Contact:** e-mail: [nukbile@ankara.edu.tr](mailto:nukbile@ankara.edu.tr)

## GRADUATE SCHOOL OF EDUCATIONAL SCIENCES

**PROGRAM NAME:** INTERDISCIPLINARY SOCIOLOGY OF EDUCATION

**Degree:** Master of Science

**Duration:** 2 years

**Language:** English

**Program Description:** The program designed as an interdisciplinary program considering educational matters in a multidimensional way within the frame of sociological, anthropological and historical backgrounds. Within this context, the program designates the points of educational sciences intersecting sociology, anthropology, history and philosophy as its field of study. The main purpose of the program is to consider the interactions of education, society and culture as the research agenda and to teach students the theoretical and practical approaches related to these interactions. Within this context, some questions regarding sociological, anthropological and historical dimensions of education as "How are learning and school organized socially and culturally?", "What are there in the background of learning outside the school?" and "What are the social, cultural and historical premises of learning practices?" are at the core of program's approach. Education, society and culture can be studied multidimensionally in this program by gathering different disciplines as education, language, law, politics, philosophy, history, anthropology.

**Language Requirement:** No requirement for international applicants. No requirement for Turkish applicants who have completed whole university education in a foreign country.

**Where to apply:** Graduate School of Educational Sciences-<http://egitim.ankara.edu.tr/en/>

**Contact:** e-mail: [ebf@ankara.edu.tr](mailto:ebf@ankara.edu.tr)

Phone: +90 312 363 33 50

web: <http://ebb.education.ankara.edu.tr/en/>

Program Details: [http://bbs.ankara.edu.tr/Amac\\_Hedef.aspx?bno=4224&bot=1844](http://bbs.ankara.edu.tr/Amac_Hedef.aspx?bno=4224&bot=1844)

## GRADUATE SCHOOL OF NATURAL AND APPLIED SCIENCES

**PROGRAM NAME:** BIOMEDICAL ENGINEERING

**Degree:** Master of Science

**Duration:** 2 years

**Language:** English

**Program Description:** The aim of the program is to train higher degree engineers who can produce strategies, devices and solutions aimed for diagnosis and therapy for the health sector by applying the engineering principles in life sciences. To train engineers who can develop new products which are needed in the biomedical sector and can make designs in order to improve current products as well as able to work in the academia. Main research topics of the program are: bio fluids, advanced biomaterial manufacturing techniques, 3D bio printing, bioreactors, stem cells, tissue engineering, cell programming, novel technologies and biomaterials to direct stem cell fate, nanomaterials in cancer and regenerative medicine. In addition, biomarker determination with proteomics and metabolomics approaches, new imaging techniques by using tissue optical and electrical properties, development of image reconstruction algorithms, and multi-modality imaging techniques. Graduate students have access to Bio fluids Research Laboratory, Biomaterials and Tissue Engineering Research Laboratory, Stem Cells and Regenerative Medicine Research Laboratory, Proteomics and Metabolomics Research Laboratory and Medical Imaging Research Laboratory.

**Language Requirement:** No requirement for international applicants. No requirement for Turkish applicants who have completed whole university education in a foreign country.

**Where to apply:** Graduate School of Natural and Applied Sciences-  
<http://fenbilimleri.ankara.edu.tr/en>

## GRADUATE SCHOOL OF NATURAL AND APPLIED SCIENCES

**PROGRAM NAME:** PLANT PROTECTION

**Degree:** Master of Science

**Duration:** 2 years

**Language:** English

**Program Description:** Studies at the department focus on the identification of the agricultural pests such as insects, mites, nematodes, other animal pests of plants, fungi, bacteria, virus and weed, as well as their distribution, biology, bio ecology and control. Additionally, theoretical and practical training and research on plant pathogen interactions, impacts of chemical pesticides on the environment and human beings, mechanical, chemical, physical and biological control of disease and pests are conducted. Aim of the program to train environment-friendly plant protection expert that possess contemporary knowledge, ability of analytical thinking-questioning, producing solutions and awareness of professional ethics with expertise on diseases and pests in agricultural products and their bioecology, host-parasite interactions, pesticides and their effects on the environment, cultural, physical, chemical, biotechnical and biological control methods, integrated pest management, integrated crop management at graduate level for the needs of public and private sector in our country and to contribute in the solution of agricultural production problems at every stage of production using basic and applied scientific research as well as to improve the agricultural production by sharing the acquired experience and newly developed technologies with producers and researchers.

**Language Requirement:** No requirement for international applicants. No requirement for Turkish applicants who have completed whole university education in a foreign country.

**Where to apply:** Graduate School of Natural and Applied Sciences-  
<http://fenbilimleri.ankara.edu.tr/en>

**Contact:** e-mail: [bitkikor@agri.ankara.edu.tr](mailto:bitkikor@agri.ankara.edu.tr)

## GRADUATE SCHOOL OF NATURAL AND APPLIED SCIENCES

**PROGRAM NAME:** ENERGY ENGINEERING

**Degree:** Master of Science

**Duration:** 2 years

**Language:** English

**Program Description:** Program offers professional training at the master's degree level with thesis. The proposed program encompasses engineering areas dealing with energy efficiency, energy services, plant management / engineering. It is clear that the proposed program is suited to academic development due to its interdisciplinary collaboration. The rapid increase in world energy demand has led to developments in production methods and energy diversity, and in this context, it is the agenda to move the developments to the technological dimension. It is especially noteworthy to benefit developments in renewable energy sources. In this way, alternatives for energy production increase, while the protection of the environment is regarded. Our aim is to educate engineers and researchers who can work on the issues mentioned in the field of energy with this program. Program is designed for students who are motivated to take on the challenges facing society in the areas of sustainable energy generation, storage, and conversion. In this program, students will learn about alternative and conventional energy technologies, the societal and environmental impact of technology developments, and the economic benefits of those developments.

**Language Requirement:** No requirement for international applicants. No requirement for Turkish applicants who have completed whole university education in a foreign country.

**Where to apply:** Graduate School of Natural and Applied Sciences-  
<http://fenbilimleri.ankara.edu.tr/en>

**Contact:** e-mail: [energy@ankara.edu.tr](mailto:energy@ankara.edu.tr)

## GRADUATE SCHOOL OF NATURAL AND APPLIED SCIENCES

### PROGRAM NAME: DAIRY TECHNOLOGY

**Degree:** Master of Science

**Duration:** 2 years

**Language:** English

**Program Description:** It is a 2 years program composed of at least 120 ECTS [at least 7 courses (56 ECTS) + Seminar (4 ECTS) + Thesis (60 ECTS)]. Prerequisite for the Master of Science degree program is to have completed a master's degree of dairy technology program. Preparatory programs are implemented for the students who graduated from the bachelor's degree program in different departments. To graduate dairy technologists who have higher education sufficiency, who are able to contribute to the field of dairy technology on practical and/or theoretical grounds, who are able to run R&D activities and who are able to contribute to overall world of science. Program aims to graduate students; who are able to run R&D activities in advanced level, who are able to monitor up-to-date technology, who are able to design new strategies in dairy processing and who are able to analyze the experimental results and publish in written form.

**Language Requirement:** No requirement for international applicants. No requirement for Turkish applicants who have completed whole university education in a foreign country.

**Where to apply:** Graduate School of Natural and Applied Sciences-  
<http://fenbilimleri.ankara.edu.tr/en>

## GRADUATE SCHOOL OF NATURAL AND APPLIED SCIENCES

**PROGRAM NAME:** LAND MANAGEMENT AND POLICY

**Degree:** Master of Science

**Duration:** 2 years

**Language:** English

**Program Description:** Opportunities of education, training, and research with an interdisciplinary approach are provided in the Department of Real Estate Development and Management in a wide range of topics such as land economics, land management and policies, land administration, land tenure system, rural/urban interactions and rural area management, natural resources and land protection, management of conservation areas, land consolidation, urban development and transformation policies, land law, land use conflicts, land use planning, spatial planning and zoning applications, Geographical Information Systems, cadastral applications, land registry, land valuation, land taxation, basin and watershed management, land acquisition and expropriation, rural transformation, rural and regional development and so on. Opportunities of career in this highly dynamic and rapidly evolving field are to prepare specialized technical staff within the scope of the program, to contribute to the solution of land problems that are faced by the local authorities, to empower the students with the related required strategic development skills constitute the main objectives of the programs. The graduate program is identified to make robust professional in land management and policies field or to continue their post-graduate education and research within the country or abroad.

**Language Requirement:** No requirement for international applicants. No requirement for Turkish applicants who have completed whole university education in a foreign country.

**Where to apply:** Graduate School of Natural and Applied Sciences-  
<http://fenbilimleri.ankara.edu.tr/en>

**Contact:** e-mail: [tanrivermis@ankara.edu.tr](mailto:tanrivermis@ankara.edu.tr)

Program Details: [http://bbs.ankara.edu.tr/Amac\\_Hedef.aspx?bno=4202&bot=1820](http://bbs.ankara.edu.tr/Amac_Hedef.aspx?bno=4202&bot=1820)

## GRADUATE SCHOOL OF SOCIAL SCIENCES

### PROGRAM NAME: LAWS IN INTELLECTUAL PROPERTY

**Degree:** M.A. (with thesis) and M.L. (LL.M.) (non-thesis)

(1- Master's Degree with thesis, 2- Non-thesis Master's program, 3- Non-thesis Master's program- evening education)

**Duration:** 2 years (M.A. with thesis program), 3 semester (Non-thesis programs)

**Language:** English

**Program Description:** This program focuses on bringing students together with WIPO at international level and Turkish Patent at national level. Program's aims; lack of expertise in both the public sector and the private sector in the field of intellectual property, to train lecturers in the field of Intellectual Property, to increase awareness of intellectual property by contributing to intellectual property education, reducing the lack of expertise that can use knowledge and create value in the field of R & D research and consultancy services both in the public sector and in the private sector on policy making, to achieve a dominant viewpoint on both the fields of intellectual property, innovation, and information management, which are interdisciplinary fields, while fulfilling all these aims, contributing to industry-university cooperation, to attract foreign researchers to Turkey and to create bridges with foreign organizations, to be the pioneer of double degree programs with international partners in the middle ward. Graduates will aware of the legal rules and dynamic structure and they adapt to the dynamism and the disciplinary nature of the area. National and international applications can be followed. As an intellectual property expert, she/he eliminates the expertise in the area.

**Language Requirement:** No requirement for international applicants. No requirement for Turkish applicants who have completed whole university education in a foreign country.

**Where to apply:** Graduate School of Social Sciences- <http://gradsocialsci.en.ankara.edu.tr/>

## GRADUATE SCHOOL OF SOCIAL SCIENCES

**PROGRAM NAME:** MEDIA AND COMMUNICATION STUDIES

**Degree:** (M.A.)

**Duration:** 2 years

**Language:** English

**Program Description:** The program is based on analyzing practical and theoretical means of mass communication and new media and the quantitative and social effects of their activities. In general this program focuses on the structure, function and effects of communicative action on persons and institutions through analyzing the structure and function of the media. The objective of this program is to educate students who will be able to understand the basic concepts of communication, adopt a scientific approach, evaluate the relation between the media and the society using interdisciplinary means, identify the problems and find solutions for them. The program will mediate the recruitment of candidates oriented to different areas of the communications industry, such as journalism, public relations expertise or television production and it will also mediate the enrolment of candidates planning an academic career. Graduates of the program will gain the ability to approach social communication through the mass media with a critical point of view, learn to develop research design in the field of social sciences, learn research methods and recognize basic research trends in the field of media and communication studies.

**Language Requirement:** No requirement for international applicants. No requirement for Turkish applicants who have completed whole university education in a foreign country.

## GRADUATE SCHOOL OF SOCIAL SCIENCES

### **PROGRAM NAME:** WATER POLICY AND SECURITY

**Degree:** (M.A.)

**Duration:** 2 years

**Language:** English

**Program Description:** The program aims to develop the theoretical and practical aspects of water management and policies. The most important contribution of the program will be the availability of synthesized information gained from research results and data in various disciplines for the public and private sector decision and policy-makers. Water Policy and Security graduate program, will focus on engaging social sciences, natural sciences, legal institutions and stakeholders and provide them synthesized and analyzed knowledge. The objective of the proposed program is to train students with necessary information and knowledge in order to contribute to sustainable water management and policies. The program aims to bring together research teams from various disciplines, conduct interdisciplinary research and build up partnerships among policy makers, water professionals, academicians and students. The proposed program, also aims to educate future leaders on water policies and security issues and target to meet the needs of Turkish institutes human resources. The program also aims to educate students with an interdisciplinary approach on local, regional, national and international dimensions of water management issues and provide innovative solutions and implementation skills.

**Language Requirement:** No requirement for international applicants. No requirement for Turkish applicants who have completed whole university education in a foreign country.

## PHD DEGREE PROGRAMS IN ENGLISH

### GRADUATE SCHOOL OF HEALTH SCIENCES

**PROGRAM NAME:** INTERDISCIPLINARY STEM CELL AND REGENERATIVE MEDICINE

**Degree:** PhD

**Duration:** 4 years

**Language:** English

**Program Description:** The Stem Cell Institute is the first institute established with the mission to serve Stem Cells and Regenerative Medicine in Turkey. The vision of the Institute is to develop more economic and rapidly evolving novel therapies to treat diseases in the field of stem cells and regenerative medicine and to achieve the National and International Center of Excellence within the body of our University. Under the scope of studies to be done at the Center of Excellence, there shall be necessity for personnel with at least a PhD degree specific to the said field. With the contribution of such personnel, the Center of Excellence shall pioneer national and international research in the ever evolving field of stem cells and regenerative medicine.

The aim of such a PhD program is to raise expert-trained researchers who can keep up with innovation, work within different disciplines and translate their background onto practice. As a result, a sufficient number of experts shall be attained for developing safe, efficient and qualified treatment methods for many diseases in a shorter period of time, more economically. Students raised within the scope of the proposed PhD program shall be acknowledged of implementation of cell-based products and drugs, ethical principles to be followed and relevant legislation, in addition to fundamental scientific education. Subsequently, PhD graduates shall have become recognizable renowned in the field of stem cells and regenerative medicine worldwide.

PhD graduates may occupy positions for duties such as researcher and/or lecturer at our University's Center of Excellence, researcher/lecturer at other universities in our country, or manufacturing personnel at public or private cell and tissue establishments.

Such as the case worldwide, implementation and legislative studies related to stem cells and regenerative medicine are rapidly evolving in our country. However, even if national legislation stipulates so, expertise programs specifically designed for training in cell and tissue banking, cell-based product manufacturing procedures, and donation and transplantation ethics do not exist yet in Turkey. The proposed PhD program promises researchers who shall be raised for the potential contribution to the clinical and industrial development of stem cells and relevant other cell resources and regenerative medicine which will manifest products manufactured from donated human tissues to treat various chronic and life-threatening diseases. This PhD program is planned to fill in this substantial gap. Stem cells and regenerative medicine are an intact area. Due to this, this subject is not a specific agenda in any PhD programs in our University or other educational associations in Turkey.

**Language Requirement:** No requirement for international applicants. No requirement for Turkish applicants who have completed whole university education in a foreign country.

## GRADUATE SCHOOL OF HEALTH SCIENCES

### **PROGRAM NAME:** INTERDISCIPLINARY UROGYNECOLOGY AND PELVIC FLOOR HEALTH

**Degree:** PhD

**Duration:** 4 years

**Language:** English

**Program Description:** Pelvic floor dysfunction, including pelvic organ prolapse and lower urinary tract, anorectal and sexual dysfunctions, affects almost half of the women in the world and in our country, significantly disrupts the quality of life and causes serious health expenditures. In this area, the training of health professionals will provide the right diagnosis and treatment approaches as well as the right preventive health services. Therefore, it is important for public health to increase the number of specialized health care professionals who have sufficient knowledge and skills in this field. Urogynecology and Pelvic Floor Health doctoral program provides in-depth training on both preventive applications and treatment approaches related to pelvic floor dysfunctions in women. This program aims to provide in-depth training in both preventive and therapeutic approaches to pelvic floor dysfunction in women and to develop researchers who can conduct independent research and review international data in this field with a critical perspective, interpret, analyze and reach new syntheses.

The aim of the course is to provide advanced knowledge, skills and skills to the health workers who have focused on pelvic floor health and provide multi-disciplinary working qualification and to contribute to the national/international scientific field and to develop practices that benefit the society. The aim of this course is to provide a program that will enable the emergence of innovative and original scientific studies in the fields of diagnosis, treatment, rehabilitation and clinical application in the field of urogynecology and pelvic floor health by specialized medical doctors, pharmacists, physiotherapists, nurses and all academic staff who will work in this field.

Graduates of this program have the opportunity to work as qualified specialists in various healthcare institutions such as "Family - Women's health centers, research and application hospitals / centers, private hospitals and university hospitals", to work as coordinator, consultant and expert in various industrial fields, to conduct scientific research and study in academic education processes at research centers and universities.

The graduates of this program have the competence to develop protective strategies in the field of pelvic floor health and pelvic floor dysfunctions, to have in-depth knowledge and skills to do research related to diagnosis and treatment approaches pelvic floor health, to make and present academic studies in this field, to produce original projects.

**Language Requirement:** No requirement for international applicants. No requirement for Turkish applicants who have completed whole university education in a foreign country.

**Where to apply:** Graduate School of Health Sciences-<http://sagbilens.ankara.edu.tr/en/>

Program Details: <http://bbs.ankara.edu.tr/Bolumler.aspx?pno=7>

## GRADUATE SCHOOL OF HEALTH SCIENCES

**PROGRAM NAME:** INTERDISCIPLINARY THE REPRODUCTIVE ENDOCRINOLOGY AND INFERTILITY

**Degree:** PhD

**Duration:** 4 years

**Language:** English

**Program Description:** Although reproductive endocrinology and infertility is an active branch of science in many developed countries, there is no regulation in our country. There is a need for gynecologists and obstetricians who research and aim a scientific approach in this field. In order to get closer to the international scientific community and to announce the name of our country in this field, specialist gynecologists and obstetricians must work in this field and they have the current knowledge on the field. Reproductive Endocrinology and Infertility (REI) doctoral program will answer the purpose for specialist who concentrated in this field.

With this program, the employment of people is not only directed towards the academy, but also aims to provide serious benefits for the public and private sector oriented processes. People who complete this doctorate program will be able to serve as qualified specialists in various healthcare institutions. In summary, this program is focused on reproductive medicine and multi-disciplinary study of health workers who have sufficient qualifications to conduct research on the subject to have advanced knowledge, skills and equipment, and thus contributing to the national / international scientific field is intended and to contribute to the development of practices that benefit the community.

This program is planned as a doctorate program under the direction of Ankara University, Faculty of Health Sciences, Faculty of Medicine, Department of Obstetrics and Gynecology. Department of Obstetrics and Gynecology, Department of Urology, Department of Genetics,

Department of Histology-Embryology and Anatomy Department are included in the program. The aim of the doctoral program is to create a multidisciplinary approach to the infertility and reproductive endocrinology in the world. In our country, it is seen that there is not any post-graduate education program focused on diagnosis and treatment related to reproductive endocrinology and infertility in public universities. The fact that our university has extensive academic knowledge related to reproductive endocrinology and infertility is an important advantage in terms of opening a doctoral program that will focus on this subject.

The purpose of this program; to meet the needs of gynecologists and obstetricians who are investigating, adopting a scientific approach and focusing on human reproduction. With this program, it is aimed that specialist gynecologists and obstetricians who conduct intensive studies in this area to make international studies and to have current knowledge and skills. "Reproductive Endocrinology and Infertility" doctoral program will meet the need for specialist physicians concentrated in this area.

**Language Requirement:** No requirement for international applicants. No requirement for Turkish applicants who have completed whole university education in a foreign country.

## FACULTY OF LANGUAGES, HISTORY AND GEOGRAPHY

### PROGRAM NAME: GREEK LANGUAGE AND LITERATURE

**Degree:** Bachelor's Degree/M.A./ Ph.D.

**Duration:** 4 years\*/ 2 years/ 4 years

**Language:** Turkish and Classic Greek \*

**Program Description:** The Bachelor's degree consists of two sections. On the first two years, program provides knowledge of Ancient Greek grammar, morphology and syntax. It provides knowledge of literature of Ionian and Attica eras. On the second two years, students analyze classical texts from philological point of major writers of Greek culture such as Homers, Plato, Xenophon, Herodotus, and Euripides. This part of program offers specific literature history courses on Hellenistic Era. The most important aim of the program is to equip their students with the formation of humanism and logical thinking by getting familiar with the first examples of freedom of mind on the classical texts and free their mind from dogmatic thinking. Ph.D. program combines strengths in traditional philology, archaeology and material culture, and more recent critical approaches in a way that allows graduate students to gain a broad, rich, and interdisciplinary understanding of the ancient Greek world. The main areas of employment of the graduates are literary criticism research (institutes of language studies and linguistics, archives and libraries), the information society (writing and collaborating with the press).
